State Board (Intermediate)	Percentage: 82.8

SKILLS

Technical Skills	Python, Java, SQL, Power BI, Excel, HTML, CSS, JavaScript
Soft Skills	Communication, Problem-Solving, Teamwork, Critical Thinking

PROJECTS

College Placement Prediction.	Oct 24 - Apr 25
--------------------------------------	-----------------

- Analyzed academic and aptitude datasets to uncover key factors influencing student placements.
- Designed and implemented SVM and Random Forest models to assess placement readiness
- Optimized data preprocessing and feature selection to enhance model performance and reliability
- Delivered insights that improved placement prediction accuracy and informed strategic decision-making

Dynamic Weather Visualization and Representation	Jun 25 - Jul 25
---	-----------------

- Developed a Python-based weather visualization tool to fetch and display real-time data from wttr.in
- Combined schematic text output with Matplotlib-based graphical representations for trend analysis
- Automated user location Detection and manual input to deliver dynamic weather insights. Implemented robust error handling to ensure reliability and seamless user experience

CERTIFICATIONS

- Data Analysis with Python (Cognitive Class)
- OCI Generative AI Certified Professional (Oracle)
- SQL and Relational Database (Cognitive Class)

EXTRA-CURRICULAR ACTIVITIES

Event Coordinator, Annual Cultural Fest	Apr 24 - July 24
--	------------------

- Ensured smooth execution of events by addressing cultural, sports, and technical events, student concerns and ensuring smooth operations by resolving conflicts.
- Acted as a bridge between organizers and participants, resolving concerns and maintaining a positive environment.
- Monitored activities to ensure alignment with plans and fostered an inclusive experience for all participants.
